HOW NUTRIENT CYCLES CONSTRAIN CARBON BALANCES IN BOREAL FORESTS AND ARCTIC TUNDRA

A conference contributing to the IGBP (International Geosphere-Biosphere Project), core project GCTE (Global Change and Terrestrial Ecosystems), Focus 1 (Ecosystem Physiology)

Peter Högberg[1], Knute J. Nadelhoffer[2] & Sarah E. Hobbie[3]

[1] *Section of Soil Science, Departement of Forest Ecology, SLU, S-901 83 Umeå, Sweden;* [2] *Ecosystem Center, Marine Biological Laboratory, Woods Hole, MA, USA;* [3] *Departement of Ecology, Evolution and Behaviour, University of Minnesota, 1987 Upper Buford Circle, MN 55108, USA*

Foreword **vii**

Influence of nutrients, disturbances and site conditions on carbon stocks along a boreal forest transect in central Canada
J.S. Bhatti, M.J. Apps and H. Jiang **1–14**

Historical and projected carbon balance of mature black spruce ecosystems across North America: the role of carbon–nitrogen interactions
J.S. Clein, A.D. McGuire, X. Zhang, D.W. Kicklighter, J.M. Melillo, S.C. Wofsy, P.G. Jarvis and J.M. Massheder **15–32**

Modelling carbon dynamics in coniferous forest soils in a temperature gradient
R. Hyvönen, M.P. Berg and G.I. Ågren **33–39**

Fire and site type effects on the long-term carbon and nitrogen balance in pristine Siberian Scots pine forests
C. Wirth, E.-D. Schulze, B. Lühker, S. Grigoriev, M. Siry, G. Hardes, W. Ziegler, M. Backor, G. Bauer and N.N. Vygodskaya **41–63**

Controls on decomposition and soil nitrogen availability at high latitudes
C.H. Robinson **65–81**

Litter quality in a north European transect versus carbon storage potential
B. Berg and V. Meentemeyer **83–92**

Mineralization and distribution of nutrients in plants and microbes in four arctic ecosystems: responses to warming
I.K. Schmidt, S. Jonasson, G.R. Shaver, A. Michelsen and A. Nordin **93–106**

Fine root production and nutrient content in wet and moist arctic tundras as influenced by chronic fertilization
K.J. Nadelhoffer, L. Johnson, J. Laundre, A.E. Giblin, G.R. Shaver **107–113**

Is growth of soil microorganisms in boreal forests limited by carbon or nitrogen availability?
A. Ekblad and A. Nordgren **115–122**

Defining nutritional constraints on carbon cycling in boreal forests – towards a less 'phytocentric' perspective
B.O. Lindahl, A.F.S. Taylor and R.D. Finlay **123–135**

Exchange of CO_2, CH_4 and N_2O between the atmosphere and two northern boreal ponds with catchments dominated by peatlands or forests
J.T. Huttunen, T.S. Väisänen, M. Heikkinen, S. Hellsten, H. Nykänen, O. Nenonen and P.J. Martikainen **137–146**

Effect of experimental nitrogen load on methane and nitrous oxide fluxes on ombrotrophic boreal peatland
H. Nykänen, H. Vasander, J.T. Huttunen and P.J. Martikainen **147–155**

Methane oxidation in boreal peat soils treated with various nitrogen compounds
I.K. Kravchenko **157–162**

A synthesis: The role of nutrients as constraints on carbon balances in boreal and arctic regions
S.E. Hobbie, K.J. Nadelhoffer and P. Högberg **163–170**

Volume 242 No. 2

Tree species mediated soil chemical changes in a Siberian artificial afforestation experiment
O.V. Menyailo, B.A. Hungate and W. Zech **171–182**

The effect of single tree species on soil microbial activities related to C and N cycling in the Siberian artificial afforestation experiment
O.V. Menyailo, B.A. Hungate and W. Zech **183–196**

Evidence for biological nature of the grape replant problem in California
A. Westphal, G.T. Browne and S. Schneider **197–203**

The effect of inoculating endophytic N_2-fixing bacteria on micropropagated sugarcane plants
A.L.M. Oliveira, S. Urquiaga, J. Döbereiner and J.I. Baldani **205–215**

Zinc Extraction potential of two common crop plants, *Nicotiana tabacum* and *Zea mays*
K. Wenger, S.K. Gupta, G. Furrer and R. Schulin **217–225**

Sulphate uptake and xylem loading of young pea (*Pisum sativum* L.) seedlings
C. Herschbach, B. Pilch, M. Tausz, H. Rennenberg and D. Grill **227–233**

Aluminum-induced secretion of both citrate and malate in rye
X. Feng Li, J.F. Ma and H. Matsumoto **235–243**

Losses of fertilizer-derived N from transplanted rice after heading
S. Takahashi and A. Yagi **245–250**

Effect of mineral nitrogen on nitrogen nutrition and biomass partitioning between the shoot and roots of pea (*Pisum sativum* L.).
A.-S. Voisin, C. Salon, N.G. Munier-Jolain and B. Ney **251–262**

N uptake and N status in ponderosa pine as affected by soil compaction and forest floor removal
A. Gomez G., R.F. Powers, M.J. Singer and W.R. Horwath **263–275**

Nitrogenase activity in composting horse bedding and leaves
C.R. Schwintzer, J.D. Tjepkema and B. Seekins **277–282**

Effects of timing of sulphur application on yield, S-uptake and quality of barley
J. Eriksen and J.V. Mortensen **283–289**

Transport of organic sulfur and nitrogen in the roots of young mycorrhizal pedunculate oak trees (*Quercus robur* L.)
S. Seegmüller and H. Rennenberg **291–297**

Corrigendum **299**

Instructions for authors **301–307**

Volume contents **309–311**

Author index **313**
